HAVERFORD RESERVE

TRAIL MAP

Walking the trails of the Haverford Reserve, you will experience old growth hardwood forests, two first order streams, wetlands, a meadow, and diverse flora and fauna. Alongside the trails, you may witness our community rain garden, water retention basins, and TreeVitalize plantings.

Natural Lands Trust completed an ecological assessment of the 124 acres of open space. In their assessment, which can be found on our website (www.HavTwp.org), Natural Lands Trust describes the vegetation, wildlife and habitat found in this watershed.

Benefits of walking the trails include improvements to your cardiovascular, muscular, and mental health and will increase your appreciation of nature.

Please enjoy our trails and help us preserve our open space. For questions or comments, contact us at recinfo@havtwp.org
